[1] Lunge Left with Bounce .

[1] {Lunge Left with Bounce} Side L leave R pointed sd & bounce pelvis sd to sd as music fades.

Notes:  Samba Bounce is used on all figures with SaS timing. It can briefly be described as a slight flexing of the knees on first ½ of the beat & a slight straightening on the second ½ of the beat. It is created by use of the knee, ankle and instep of the leg supporting the weight while the other knee works in sympathy. The bounce is even, smooth, subtle and never exaggerated.

Timing of /&: ‘a’ = 1/4 of a beat, step prior uses 3/4ths of the beat  ‘&’ = 1/2 of a beat, step prior uses the other 1/2 of the beat

Cuban Cross is also called Latin Cross and refers to a position of one foot crossed behind the other with the toe of the foot in back & near the heel of the front foot with the toe turned out. Almost all Volta figures have the Cuban Cross action.
